

Gumbel (Type I EV) noise

Multinomial Logit (Softmax)

$$P(C = i) = \frac{\exp(v_i)}{\sum_{j=0}^K \exp(v_j)}$$

Gaussian (Normal) noise

(Independent) Multinomial Probit

$$P(C = i) = \int_{-\infty}^{+\infty} \prod_{j \neq i} \Phi(x - v_j) \cdot \phi(x - v_i) dx$$
